

# FACTSHEET CARMATOP

## Carbon Management for Tour Operators

### Programme

Name:

RAAK-SME (Regional  
Attention and Action  
for Knowledge  
Circulation)

Funding:

Dutch Ministry of  
Education, Culture and  
Science (OCW)

Managed by:

Foundation Innovation  
Alliance (SIA)

### Contact

Project leader:

Paul Peeters

peeters.p@nhtv.nl

### Affiliation and Address

NHTV University of  
Applied Sciences  
Centre for Sustainable  
Tourism & Transport  
Mgr. Hopmansstraat 1  
4817 JT Breda  
NETHERLANDS

### Web site

[www.cstt.nl/Projects/  
CARMATOP/17](http://www.cstt.nl/Projects/CARMATOP/17)

### Timeline

Start: 01/03/2013

End: 28/02/2015

### Budget

Cost: 442.712 EUR

Funding: 298.436 EUR

### Project Partners

2 Universities of  
Applied Sciences  
(NHTV & HZ)

Dutch Association of  
Travel Agents and  
Tour Operators  
(ANVR)

3 expert centres for  
carbon management &  
sustainable tourism  
(NHTC CSTT, CNG &  
ECEAT)

11 SME tour operators

### GOAL

The project goal of CARMATOP is to develop and test new knowledge about the measurement of tour package carbon footprints (CF) and translate this into a simple application which allows tour operators to integrate carbon management into their daily operations. By doing this Dutch tour operators, all ANVR members (Dutch Association of Travel Agents and Tour operators), are international frontrunners.

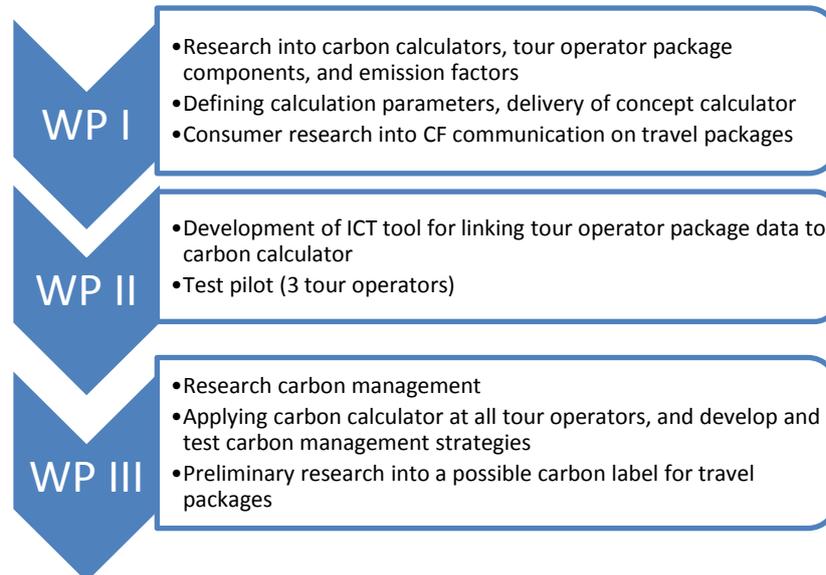

### WHY ADDRESS THE CARBON FOOTPRINT OF TOUR PACKAGES?

Global tourism contribution to man-made CO<sub>2</sub> emissions is around 5%, and all scenarios point towards rapid growth of tourism emissions, whereas a reverse development is required in order to prevent climate change exceeding 'acceptable' boundaries. Tour packages have a high long-haul and aviation content, and the increase of this type of travel is a major factor in tourism emission growth. Dutch tour operators recognise their responsibility, and feel the need to engage in carbon management.

### WHAT IS CARBON MANAGEMENT?

Carbon management is the strategic management of emissions in one's business. This is becoming more important for businesses, also in tourism, because of economical, societal and political developments. For tour operators some of the most important factors for taking action are increasing energy costs, international aviation policy, pressure from society to become greener, increasing demand for green trips, and the wish to obtain a green image and become a frontrunner among consumers and colleagues in doing so.

### PROJECT SET-UP

### NETWORK

Project management is in the hands of the **Centre for Sustainable Tourism and Transport (CSTT) of NHTV Breda University of Applied Sciences**. CSTT has 10 years' experience in measuring tourism emissions and developing strategies to mitigate emissions, and enjoys an international reputation in this field. The **ICT Associate Professorship of HZ University of Applied Sciences** has longstanding expertise in linking varying databases of different organisations. Its key role in CARMATOP is to create the link between the carbon calculator and tour operator data (systems). **ANVR, the Dutch Association of Travel Agents and Tour operators**, represents 180 tour operators and 1500 retail agencies in the Netherlands, and requires all its members to meet a minimum of sustainable practices through a number of criteria. ANVR's role is in dissemination, networking and ensuring CARMATOP products will last. **Climate Neutral Group's** experience with sustainable entrepreneurship and knowledge about carbon footprint (mitigation), and **ECEAT's** broad sustainable tourism network, provide further essential inputs for CARMATOP. Finally, most of the **eleven tour operators** are sustainable tourism frontrunners in the Netherlands, and are the driving forces behind this project.
